

Civil Engineer opportunity with Brazos Electric Power Cooperative-Waco, TX

Join Our Team as an Electrical Substation Design Civil Engineer!

Are you a Civil Engineer passionate about shaping the future of energy infrastructure? Do you thrive on designing and improving critical facilities that power communities? If so, we have the perfect opportunity for you!

What You'll Do:

As an Electrical Substation Design Civil Engineer, you will:

Design & Innovate

- Craft and analyze engineering drawings and specifications.
- Design cutting-edge electrical substation equipment, from steel structures to control buildings, ensuring compliance with industry standards.

Plan & Develop:

- Lead the development of new electrical substation and switching station facilities.
- Enhance existing infrastructures with innovative solutions.
- Conduct thorough engineering studies and support project management, from cost estimation to field inspections.

Collaborate & Impact:

- Work closely with our purchasing department and vendors to ensure top-notch product specifications.
- Provide vital technical support within our Engineering Department and beyond.

What You'll Bring

A Bachelor's degree in Civil Engineering from an ABET-accredited university (other engineering disciplines with relevant experience considered).

Why Brazos Electric?

- Be at the forefront of the energy sector, designing facilities that power our world.
- Collaborate with a dynamic team of professionals.
- Enjoy a role that combines office work with hands-on field experience.
